MapleCFO: weekly commit report (Stage 2)

Repository: https://github.com/Krishna7997/EECS-3311-Project · Branch: `main` · Times are Toronto local time.

A **code commit** changes implementation or test code (`src/` or `pom.xml`). Commits that change only documentation (README, report, UML, AI log, video scripts) are listed for completeness but are not counted. The course minimum is 5 code commits in each period.

How this was produced: `git log` on `main` for each period (Toronto time); a commit counts as code when it changes a file under `src/` or `pom.xml`. Every commit links to its page on GitHub, which shows the full change.
